

Product Information Sheet

Cleaning Clay, Clay Mitt, Clay Sponge, and Clay Disc

Product Overview:

ROTWEISS cleaning clay and clay products offer an effective solution for thorough cleaning and removing contaminants from paint and glass surfaces. These products remove stubborn deposits such as tree sap, tar, rust spots, and insect residues without damaging the surface. They are ideal for pre-polishing or sealing.

General Product Features:

- **ROTWEISS Cleaning Clay:**

- Material: Clay with crystalline solids (chalk).
- Application: Removes stubborn contaminants from paint, glass, chrome, and other smooth vehicle surfaces such as tar, tree sap, industrial dust, and rust spots.
- Features: Very precise in handling as the pressure can be directly controlled. Gentle on paint, leaves no scratches. Ideal for preparation before polishing and sealing. The clay must be regularly folded to maintain clean surfaces.
- Packaging unit: 1 piece.
- Variants: 100 g or 200 g.

- **ROTWEISS Clay Mitt:**

- Material: Special polymer coating on a flexible microfiber glove (Composition: 80% polyester, 20% polyamide).
- Application: Suitable for large areas, efficiently removes contaminants on vehicles.
- Features: Ergonomic, quick to use, and easy to clean. Washable and reusable.
- Packaging unit: 1 piece.

- **ROTWEISS Clay Sponge:**

- Material: Foam with an integrated polymer cleaning layer.
- Application: Removes dirt from paint and glass surfaces. Ideal for quick cleaning, even on larger areas.
- Features: Easy to use, easy to clean, reusable, and very effective.
- Packaging unit: 1 piece.

- **ROTWEISS Clay Disc:**

- Material: Special polymer cleaning layer on a foam disc.
- Application: Removes stubborn contaminants from paint, glass, and other smooth vehicle surfaces.
- Features: Suitable for use with polishing machines or dual-action machines. Ideal for the efficient cleaning of large surfaces. Can also be used manually with the hand backing plate. Reusable.
- Packaging unit: 1 piece.
- Variants: Ø 125 mm or Ø 150 mm

Product Information Sheet

Cleaning Clay, Clay Mitt, Clay Sponge, and Clay Disc

Benefits of ROTWEISS Clay Products:

- **Thorough Cleaning:** Reliably removes stubborn contaminants like tree sap, tar, brake dust, and rust spots.
- **Surface-Friendly:** Gentle cleaning without scratches or damage on sensitive surfaces.
- **Versatile Use:** Suitable for paint, glass, and chrome. Perfect for vehicle care and detailing.
- **Easy Application:** Can be used manually (clay, mitt, sponge) or with machines (clay disc).
- **Reusable:** Long-lasting and reusable after cleaning.

Areas of Application:

- **Vehicle Care:** Ideal for removing surface contaminants on smooth surfaces.
- **Boat Care:** Effective in removing deposits on fiberglass, gelcoat, and painted surfaces.
- **Workshop and Detailing:** Professional surface cleaning before polishing and waxing.
- Not suitable for matte, textured paint, and wraps.

Application:

- Thoroughly clean the surface.
- **Cleaning Clay:**
 - Spray the surface with a little water and gently rub the cleaning clay over the surface.
 - In addition to water, a highly diluted solution of ROTWEISS Active Foam or ROTWEISS Intensive Cleaner can also be used as a lubricant.
 - Check if all irregularities and contaminants have been removed. If necessary, repeat the process until the surface feels smooth.
 - Knead the dirt particles adhering to the clay into the inside of the mass. The cleaning clay can be used repeatedly until it is fully saturated with dirt particles.
 - After use, store the clay back in its storage box.
- **Clay Mitt, Clay Sponge, and Clay Disc:**
 - Spray the surface with a little water and work the clay product over the surface with gentle pressure.
 - A diluted solution of ROTWEISS Active Foam or ROTWEISS Intensive Cleaner can also be used as a lubricant.
 - Occasionally rinse the clay product to remove dirt particles adhering to the clay.
 - During this time, check the surface for irregularities and further contaminants. If necessary, repeat the process until the surface feels smooth.
 - After use, thoroughly rinse the clay product with clean water and allow it to dry. Store it dry until the next use.

Care Instructions:

- **Cleaning Clay:** Regularly fold the clay to encapsulate contaminants and keep the surface clean. Store in the packaging after use.
- **Clay Mitt, Clay Sponge, and Clay Disc:** During use, regularly rinse the clay surface with water to remove debris. After use, rinse thoroughly with water and let air dry. Do not dry in direct sunlight.
- Store in a cool, dark, and dry place.
